Dear Simon

I would like to take this opportunity to thank every one who contributed to the delivery of the P-Way Stage in weeks 5 – 9, in which we re-laid twenty ends of S&C and associated plain line in conjunction with Balfour Beatty with a mixture of HW machines and HPSA points. We also undertook eleven ends of point conversions from clamp locks to HW machines on the Basingstoke to Reading line and ran out 200km of power and line-side cabling with the cable train. This was an extremely difficult period, but with everyone's contribution, our client Network Rail was extremely pleased with the final result.

I really do appreciate just how much all of you have had to sacrifice over five consecutive weeks. Please pass our thanks to all your staff who were involved.

Yours sincerely

Lee Roberts
